

Carolina Araujo

(b. 1976)

Araujo, from Rio de Janeiro, Brazil, did her graduate work in the US. She is full professor at the Instituto Nacional de Matemática Pura e Aplicada (IMPA) in her native city, and a Simons Associate at the Abdus Salam International Centre for Theoretical Physics (ICTP). Araujo works in complex algebraic geometry, and has had 5 PhD students. Araujo won the L'Oreal Award for Women in Science in Brazil (2008). In 2018 she spoke at the International Congress of Mathematicians, led the inaugural

World Meeting for Women in Mathematics, and was Vice President of the IMU's Committee for Women in Mathematics. Araujo was awarded the Ramanujan Prize from ICTP (2020).

This poster is part of the EvenQuads project, which combines innovative mathematical card games with learning about amazing women mathematicians. The project celebrates the 50th anniversary of the Association for Women in Mathematics.
