

# Deanna Haunsperger

(b. 1964)

Haunsperger is a full professor of mathematics at Carleton College. Her research topics include population statistics and voting theory. She was one of the first editors of the MAA *Math Horizons* magazine, and co-edited *101 Careers in Mathematics* (2019). Haunsperger co-created and directed the NSF-funded Carleton College Summer Mathematics Program for Undergraduate

Women (SMP); over 85 alumnae have completed doctorates in mathematical sciences. SMP was recognized with the AMS Mathematics Programs that Make a Difference Award (2014). Haunsperger served as president of the MAA (2017–2018). She won the AWM Gwyneth Humphreys Award (2012), MAA Meritorious Service Award (2016), AWM Presidential Award (2017), and the MAA Gung-Hu Award (2021).

This poster is part of the EvenQuads project, which combines innovative mathematical card games with learning about amazing women mathematicians. The project celebrates the 50th anniversary of the Association for Women in Mathematics.
