Annie Raymond (b. 1986)

Annie Raymond, from Montreal, Canada, earned her BS in mathematics and music at MIT (2009) and her PhD from Technische Universität Berlin (2014). Raymond is currently in a tenurable position at the University of Massachusetts-Amherst. She has published in polyhedral combinatorics, combinatorial optimization, operations research, and applied algebraic geometry. Raymond features women and people of color in mathematics at _forall_ on Instagram and _www.mathisforall.com_. She develops college-level mathematics programs for incarcerated populations, teaches in prisons, gives outreach presentations to K–12 students multiple times each year, and has supervised at least seven REU projects, many of which involved students who are women or people of color.

This poster is part of the EvenQuads project, which combines innovative mathematical card games with learning about amazing women mathematicians. The project celebrates the 50th anniversary of the Association for Women in Mathematics.
