

Annie Selden

(b. 1938)

Annie Selden obtained her PhD from Clarkson University (1974). After teaching in Turkey and Nigeria post-PhD, she spent the rest of her career at Tennessee Technical University. Inspired by her international teaching experiences, Selden was one of the first to promote research in the teaching of undergraduate college mathematics. She co-created the Research in Under-

graduate Mathematics Education (RUME) special interest group of the MAA, and has made significant contributions through her editorial work. Selden was one of the small group of women who proposed the creation of an Association of Women in Mathematics (AWM) in 1971. She won the AWM Hay Award (2002) and was elected Fellow of AAAS (2003).

This poster is part of the EvenQuads project, which combines innovative mathematical card games with learning about amazing women mathematicians. The project celebrates the 50th anniversary of the Association for Women in Mathematics.
