Cheryl Praeger (b. 1948)

Cheryl E. Praeger earned a PhD at Oxford University (1973) and a DSci at the University of Western Australia (1989). She taught at UWA 1976–2017. Praeger has published more than 400 research papers on permutation groups, combinatorial designs, and graph theory, with more than 200 co-authors. Praeger does outreach to encourage girls to enter STEM. She served as the first female president of the Australian Mathematical Society and was named a 2013 American Mathematical Society Fellow. Praeger became the first female recipient of both the Thomas Ranken Lyle Medal of the Australian Academy of Science (2013) and the George Szekeres Medal of the Australian Mathematical Society (2014).

This poster is part of the EvenQuads project, which combines innovative mathematical card games with learning about amazing women mathematicians. The project celebrates the 50th anniversary of the Association for Women in Mathematics.
