

Ilana Seidel Horn

(b. 1971)

Ilana Horn obtained her PhD in mathematics education from the University of California, Berkeley (2002). She is currently a professor of mathematics education at Vanderbilt University. Horn's research in equitable mathematics education involves the relation of mathematics teacher learning to instructional improvement, especially in urban schools. She has written more than 30 articles, 16 book chapters, and three books, often fo-

ocusing on how to make authentic mathematics more available to students historically excluded from the discipline. Horn has been principal or co-principal Investigator for a dozen grants funded by the National Science Foundation, the Carnegie Foundation, and the Spencer Foundation. She received the Distinguished Faculty Colleague Award at Peabody College, Vanderbilt University (2019).

This poster is part of the EvenQuads project, which combines innovative mathematical card games with learning about amazing women mathematicians. The project celebrates the 50th anniversary of the Association for Women in Mathematics.
