

María del Rosario Zavala (b. 1980s)

María del Rosario Zavala obtained a PhD in Mathematics Education from the University of Washington (2012) after earning a BA in Mathematics at the University of California, Santa Cruz. She is an Associate Professor of Elementary Education at San Francisco State University. Zavala's research focuses on equity issues in mathematics education, specifically identity development and culturally responsive practices

in mathematics education of Latinx students and other historically marginalized populations. She hosts the podcast of the professional organization TODOS Mathematics for ALL!, which advocates for equity and excellence in mathematics education. In 2019 she was featured in *Lathisms*, a website that showcases the contributions of Latinx and Hispanic mathematicians.

This poster is part of the EvenQuads project, which combines innovative mathematical card games with learning about amazing women mathematicians. The project celebrates the 50th anniversary of the Association for Women in Mathematics.
