

Mei-Chi Shaw (b. 1955)

Born and raised in Taipei, Mei-Chi Shaw earned her PhD from Princeton University (1982) and is currently a professor at the University of Notre Dame. With over 60 peer-reviewed research publications, her interests are in complex analysis, partial differential equations, and complex geometry.

Shaw co-authored a graduate textbook on these subjects and serves as an editor for journals such as the *Proceedings of the AMS* and *Journal of Geometric Analysis*. Shaw is an inaugural Fellow of the AMS (2013) and in 2019, was the second woman to win the AMS Bergman Prize for her lifelong contribution to several complex variables. The 2022 Midwest Several Complex Variables Conference was held in her honor.

This poster is part of the EvenQuads project, which combines innovative mathematical card games with learning about amazing women mathematicians. The project celebrates the 50th anniversary of the Association for Women in Mathematics.
