

Omayra Y. Ortega (b. late 1970s)

Omayra Y. Ortega earned a PhD (2008) and MS (2005) in applied mathematics and computational sciences, along with an MPH (2005), all at the University of Iowa. She is an associate professor of mathematics and statistics at Sonoma State University and previously worked at Arizona State University and as a healthcare analyst. Ortega's research focuses on math-

ematical epidemiology and computational biology. She has directed the Mathematical Epidemiology Research Group for undergraduates since 2009 and organized an annual Sonia Kovalevsky High School Mathematics Day since 2006. She is serving a 2021–2024 term as President of NAM. She received an AWM Service Award (2020) and will deliver the Hrabowski-Gates-Tapia-McBay Lecture at the 2023 JMM.

This poster is part of the EvenQuads project, which combines innovative mathematical card games with learning about amazing women mathematicians. The project celebrates the 50th anniversary of the Association for Women in Mathematics.
