

## Pao-sheng Hsu (b. late 1930s)

Pao-sheng Hsu received her PhD in mathematics in 1975 from Polytechnic University in New York. She taught undergraduate mathematics for over thirty years and is now an independent consultant. Hsu has published in both measure theory and mathematics education. She was the founding chair of the AWM Education Committee (1996) and a co-founder of the AWM Teacher Partnership Program

(2006), which pairs mathematicians in all areas of research, including mathematics education, with K–12 teachers of mathematics. Hsu received an AWM Service Award (2013), and was named a Fellow of the AWM (2019) for her research and her leadership in building mathematics education communities.

This poster is part of the EvenQuads project, which combines innovative mathematical card games with learning about amazing women mathematicians. The project celebrates the 50th anniversary of the Association for Women in Mathematics.
