

T. Christine Stevens

(b. 1948)

T. Christine Stevens earned her PhD in mathematics from Harvard University (1978). She was the AMS/MAA/SIAM Congressional Fellow (1984–1985) and a NSF program officer (1987–1989). Stevens was a mathematics professor at Saint Louis University (SLU) for 25 years and then worked for the AMS (2014–2021). Her research contributions are in the theory of topological groups and the history of

mathematics. In 1994, Stevens co-founded MAA's Project NExT, a professional development program for new PhDs in mathematics, and directed it until 2009. Stevens won the MAA Haimo Award (1997), the MAA Gung and Hu Award (2004), the Smith College Medal (2010), and the AWM's Louise Hay Award (2015). She was named fellow of AAAS (2005) and the AMS (2013).

This poster is part of the EvenQuads project, which combines innovative mathematical card games with learning about amazing women mathematicians. The project celebrates the 50th anniversary of the Association for Women in Mathematics.
