SCUDEM Lite 2020 Challenge Results

Results from the SCUDEM Lite 2020 Challenge can be found in [this resource link](#). There you will find the full statement of the problem in the Supporting Documents area and the video submission for many of the participants in the Abstract area.

Eight teams of three undergraduate students each from Dixie State University, Idaho State University, and Washington State University-Vancouver submitted 10 minute video presentations. Twenty one judges volunteered to view, score, and make comments on the video presentations and awards were sent out to the teams. We thank our judges and all the people who volunteered to make this challenge a success in the midst of the pandemic, and we congratulate all of our student challengers for their amazing success in tackling our Challenge problem.
