Day 2 - 7:00 PM–8:00 PM: Presentations on Social Issues and Opportunities

Letters from Math Camp
(R3A) Scott Taylor, Sum Camp Producer, Mathematics, Colby College, Waterville ME USA
Starting a local summer math camp

Abstract: In 2019, I and a group of local teachers started a summer camp designed to use the arts and math games to instill a basic sense of numeracy in local public school children who are behind grade level in math. I'll describe the vision for the camp and its future, our partnership with the local public schools, and our current funding strategies and future plans.

We offer a very descriptive AMS Blog on Teaching and Learning Mathematics at https://blogs.ams.org/matheducation/2022/01/31/3832/ in lieu of slides and video.
