

# Entrepreneurship Graduate School Programs

Join the NSF funded CONNECT Network,  
a community of practice to share  
resources and experiences in biosciences  
entrepreneurship and undergraduate  
biology education

## Why connect now?

- Join a community of like-minded STEM graduate school programs focused on training the **next generation of diverse entrepreneurial leaders** in their field
- Identify opportunities to **foster entrepreneurial thinking** in the graduate curriculum
- Inform your graduate-level programming with data from an undergraduate needs-assessment of **biosciences entrepreneurship curriculum**

## Why stay connected?

- Opportunity to mentor motivated bioscience students with a proven **entrepreneurial and use-based innovation mindset**
- Ability to **influence the national bio-entrepreneurship curriculum** in order to prepare prospective graduate students to excel within the graduate program
- Support an application to **multiyear federal funding**, e.g. 5-year NSF RCN-UBE application, 5-year NSF IUSE application, etc

## CONNECT with CONNECT

### About Us:

Through NSF funding, we are creating a vibrant, inclusive community space where educators, students, and entrepreneurs can collaborate to share resources and best practices for incorporating the emerging field of biosciences entrepreneurship into undergraduate biology education, with an attention on BIPOC community members. The CONNECT network aims to have broad national membership including historically Black Colleges and Universities (HBCUs) and other Minority Serving Institutions (MSIs). The initial outcome of this network will be a data-rich snapshot of participants' needs and a directive for an inclusive entrepreneurial ecosystem that enriches the undergraduate curriculum.
