

Unit 3, Activity 3: Concluding the Module

Interdisciplinary lessons that include geoscientific thinking and content are rich venues for exploring [societal issues](#). When your lesson plans are returned, the class will engage in a discussion of examples of how your lesson and those of your classmates can be linked to societal issues. Lessons that address important societal issues can provide powerful means for engaging your students in the subject matter. Examples of such [critical needs](#) are provided by the American Geosciences Institute.
